

MOBILE SOLAR FRAME

Boost your green energy

LIGHTWEIGHT FRAME

The 2.37 kWp photovoltaic frame is a high-performance solution for solar energy generation. Compact and efficient, it captures maximum energy thanks to its high-performance panels. Ideal for remote sites, events, or temporary installations, it provides autonomous and environmentally friendly power supply. Easy to install, it offers a sustainable alternative to reduce traditional energy consumption and limit carbon footprint.

Technical features

Reference	CAPVLE0601
Module power	395 Wp
Total power	2,37 kWp
Module quantity	6
Connection	Connector MC4
Dimensions (l×w×h)	5780×2249×62 mm
Weight	250 kg
